Cloudey is officially registered in **Estonia**, which is part of the **European Union**.

We have a presence in Estonia and the Netherlands, and have servers all over Europe, notably in Germany, the Netherlands, Finland and France.

We are governed by the laws and regulations of both Estonia and the European Union, including the EU copyright laws and GDPR, both of which we enforce to the full extent required by applicable law. We do **not** submit to DMCA complaints, as we are not governed by the laws of the United States. However, we comply with relevant copyright and trademark complaints under EU law.

How long have you been in business?

Cloudey was founded in **2014**. We have built a solid foundation for our business and gained a lot of trust from our customers, and we don't plan to stop any time soon!

Which services do you provide?

We strive to offer a full range of services for small and medium enterprises as well as private customers, with each one of our services complementing the others.

Our main focus is **shared web hosting**, which we complement with **managed hosting** services. For a slightly larger scale, we also offer **managed VPS** and **dedicated servers**.

We also provide **web development** for those who don't yet have a website to host!

In addition, we **consult** and advise enterprise customers on technical and cloud-related subjects.
