

# Where are the servers located?

All of the servers we use for web hosting services are located in **Germany**. The central location and proximity to network interchanges ensures low latency and fast loading times all over Europe as well as abroad. Your personal data is never transferred outside the EU, ensuring compliance with GDPR and other data privacy regulations.

If you are looking to host your site in a different location, feel free to [get in touch with us](#) for a custom solution.
